

Fire Certificate

Banner Stands

Banner stands are constructed from more than 75% Aluminium parts.
The melting point for Aluminium is 660°C and it is not considered to be a fire hazard.

Modular Panels

Ultima Displays does not have a specific Flame retardant specification for its Modular panels.
However, for the four panel types ie Baseline, Contender, Matrix and Phantom the following applies:

- Loop nylon fabric complies with the flammability requirements for Type B, as specified in clause 5.2 of BS 5867: Part 2: 1980.
- Foam backed loop nylon fabric may be described as "Flameproof" when it is tested in accordance with BS 3119: 1958 and when it is assessed by the criteria given in BS3120:1959
- Polyweave fabric complies with the flammability requirements for Class 1 flamespread as specified in BS 476: Part 7: 1987
- Frontrunner / Prelude fabric complies with the flammability requirements for Class 2 flamespread as specified in BS 476: Part 7: 1987
- Dufaylite Developments Limited lightweight pinnable display panel complies with flammability requirements for Class 1 flamespread as specified in BS 476: Part 7: 1997 (excluding Baseline)

Pop-Ups

Ultima Displays does not have a specific Flame retardant specification for its Pop-Ups.
However, the materials used to construct Pop-Up systems are outlined below:

Item	Material
Pop up frame	Aluminium alloy
Hubs	ABS
Screws	Zinc-plated steel
Magnets	Neo ferrous magnet
Hangers	ABS

Evolution pop-ups are constructed from more than 75% Aluminium parts.
The plastic components are manufactured using ABS non-flammable self-extinguishing plastic.

Lighting / Electrical

All Powerspot lighting and electrical products conform with CE standards. Individual lighting test reports are available on request.

Physique

Physique portable furniture is mainly constructed from MDF and fabric materials
(see Modular Panels above for fabric specifications.) MDF Fire Test report available on request.

NB If further documentation is required, test reports may be available on request.
